

People Counting and Capacity Management Solution

EAIGLE is a leader in artificial intelligence and computer vision technology, designing next-generation solutions to address the most complex challenges faced by facilities across multiple industries.

Our state-of-the-art computer vision, artificial intelligence and machine learning technology is designed to integrate seamlessly and drive health & safety compliance, and operational efficiencies.

People Counting

Mask Detection

Analytics & Reporting

API Integration

PIPEDA Compliance

Integration with access control

Automated Traffic Management

Lower Labor & Operational Cost

Reduce Human Interaction

Reinforce Social Distancing

Space Optimization

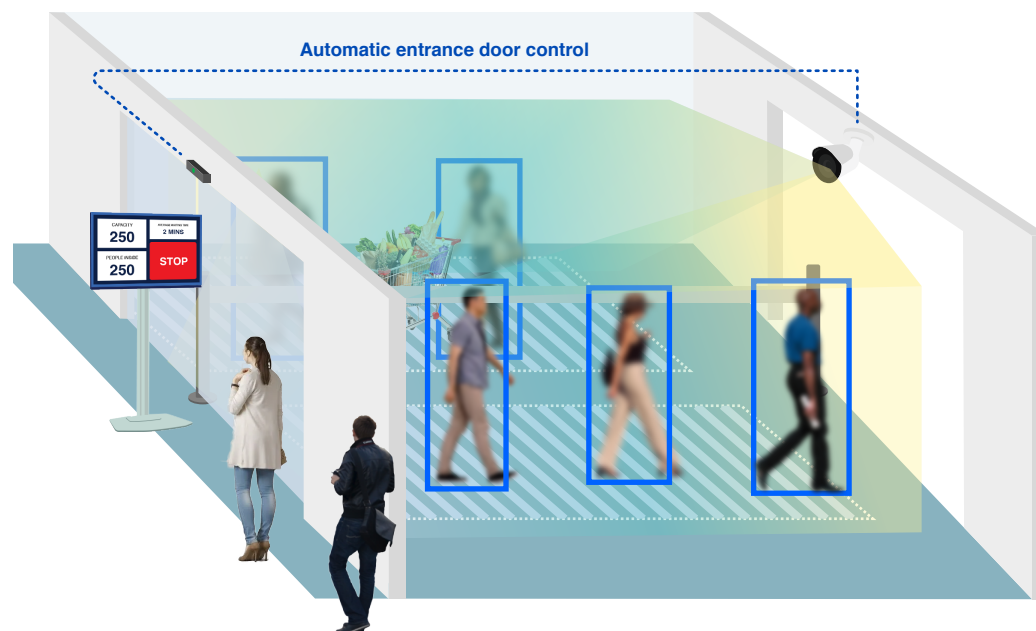

Reduce Risks & Liability

Automate people counting

Monitor traffic flow

Enhance staff planning

Automate entry control based on capacity limit
